

**Richard N. Veazey**

**Work Experience:**

**January 12, 2012 to Present:**

*Third Coast Enterprises, Inc., Hempstead, Tx.*

- \* *Quality Control Supervisor*
- \* *Environmental QC on a 700 square mile on-and-offshore project southeast of Houston, Texas. The project ran from January through October, 2012, during multiple environmental concern periods and covering three federal wildlife reserves.*

**August 5, 2003 to January 12, 2012:**

*Channelview ISD, Channelview, Tx.*

- \* *Instructor (9th - 12th Grade) - Responsible for producing and presenting curriculum in Computer Aided Drafting, architecture, construction, 3D animation, agricultural algebra, electronics and transportation; instruction and assessment in shop, lab and environmental awareness and safety*
- \* *Skills USA (VICA) Advisor – Multiple competitions and awards at District and State levels with advancement to Nationals*

**January 1, 2002 to August 1, 2003:**

*United Exploration Services Inc., Barker, Tx.*

- \* *Vice President*
- \* *Survey Coordinator – Responsible for survey operations, permit compliance and mapping & tracking of 3D seismic field operations.*

**November 1, 1993 to December 31, 2001:**

*Eagle Geophysical Onshore Inc., Needville, Tx.*

- \* *Contract Surveyor / Survey Supervisor – Worked extensively in Texas, Louisiana, Mississippi and Alabama*
- \* *June 1996 - December 2001: Survey Coordinator / Supervisor in charge of survey field operations, permit compliance and mapping & tracking of all facets of 3D seismic front end operations; involved in most of Eagle's operations; supervised five to fifty men per job and up to three jobs at a time*
- \* *December 1994 - June 1996: Survey data processor - In coordination with supervisor and manager, overhauled entire survey field operation with database management and CAD based mapping & tracking field operations*
- \* *November 1993 - December 1994: Surveyor- Ran a small 3D seismic survey crew used mostly for crew expedition and detail work*

**July 3, 1997 to November 18, 1999:**

*NAROK Technologies Inc., Baytown, Tx.*

- \* *Co-owner and President of a small company founded to process 3D seismic survey data – collected and compiled survey and permit data for mass distribution to seismic crew personnel; mapping included production and tracking of all front end operations*
- \* *NAROK was a seven person operation at its peak with multiple field operations from southern Louisiana to northern California*

**Summary of Seismic Experience:**

- \* *I was on a seismic survey crew by the time I was old enough to get out of the way; running an instrument (compass traverse) by sixteen; running my own crew (plate angle) by nineteen; in charge of survey operations and running my own processing company by my mid- twenties*
